... and Many More

## CUSTOMER INTEL

**Abhishek  
Nayak**

Mr. Lawrence executed the entire project for our company very effectively. His teams service is prompt. Highly recommend.

**Suresh  
Kumar**

At the outset, Lawrence is a best solution provider when it comes to metering and IoT solutions. Seamless execution without disturbing any of the existing critical infrastructure which is a key for any metering or IoT solutions. He understands the needs, requirements and more importantly know how these data can be interpreted for an effective outcome. Also the best part is to be able to provide similar solutions across inside and outside of India.
